FIBER OPTIC DIN RAIL BOX

DESCRIPTION

barpa's Fiber Optic DIN Rail Box is designed typically for industrial environments that demand robust and reliable solutions. This box provides distribution and terminal connections for a variety of optical fiber systems where optical cables, patch cords, or pigtails need to be efficiently connected in limited spaces. With a compact design, this box can be used with different ports and offers secure cable entries and an integrated fiber optic splice tray. This product helps you to ensure performance and durability in demanding environments.
