EN

# Instructions Manual
# One-Step Cleaning Cassette for Fiber Optic Connectors

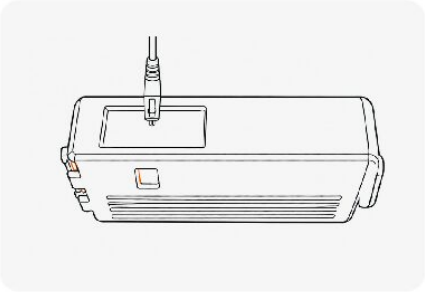

## Operation

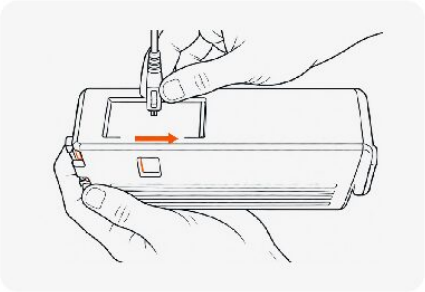

1. Hold the cassete in your palm and press the lever with your thumb.

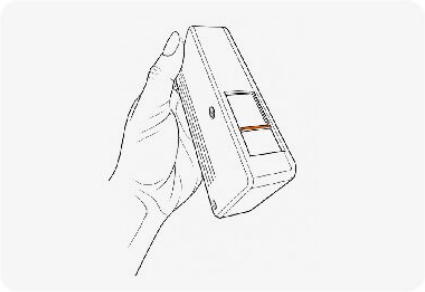

2. Keep the lever pressed and hold the connector perpendicular to the tape.

3. Rotate the connector gently left and right, then slide it once in the direction shown.

4. Lift the connector away from the tape, then release the lever and allow it to return to its initial position.
